

NexusPolis

A German Civic-/GovTech platform for digital democracy — connecting citizens, politicians, and municipalities

Prepared by: NexusPolis Team

Introducing the Challenge

The Problem

How do we **Acquire, Activate, and Retain** users onto the platform — without relying on **large marketing budgets**?

The Opportunity

What if we adapt the marketing strategies and the platform for younger users?

Activating AI-Driven Digital Democracy: How Can Civic Engagement Be Increased on Nexus Politics?

Nexus Survey Sample

Who did we ask?

We collected 50+ survey responses from people who are close to our target audience: young, digitally active users.

Demographics

50+ survey responses

85.8% aged **18–34**

59.2% students

Mostly **young**, digitally **active**
respondents

Civic behavior

Interests:

- Public issues
- Local topics
- Real-life impact

Pain points:

- Low influence
- Low trust
- Privacy concerns

Key takeaway

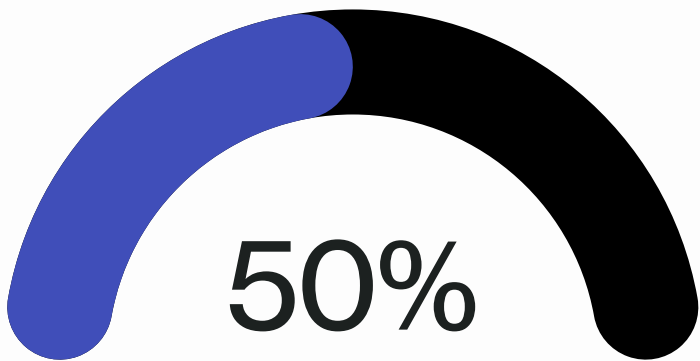

Our survey reached the right target audience: young and digitally active people who are interested in public issues, but often feel that their voice does not create real impact.

Interest exists, Impact feels low.

Interest

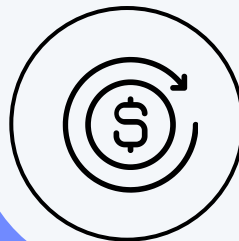

People are not completely disconnected from politics.

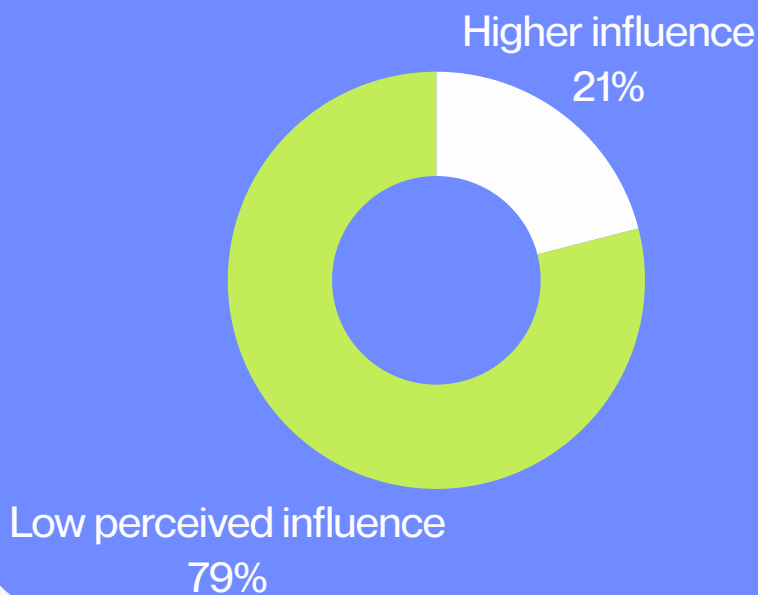

50%

High interest

Influence Gap

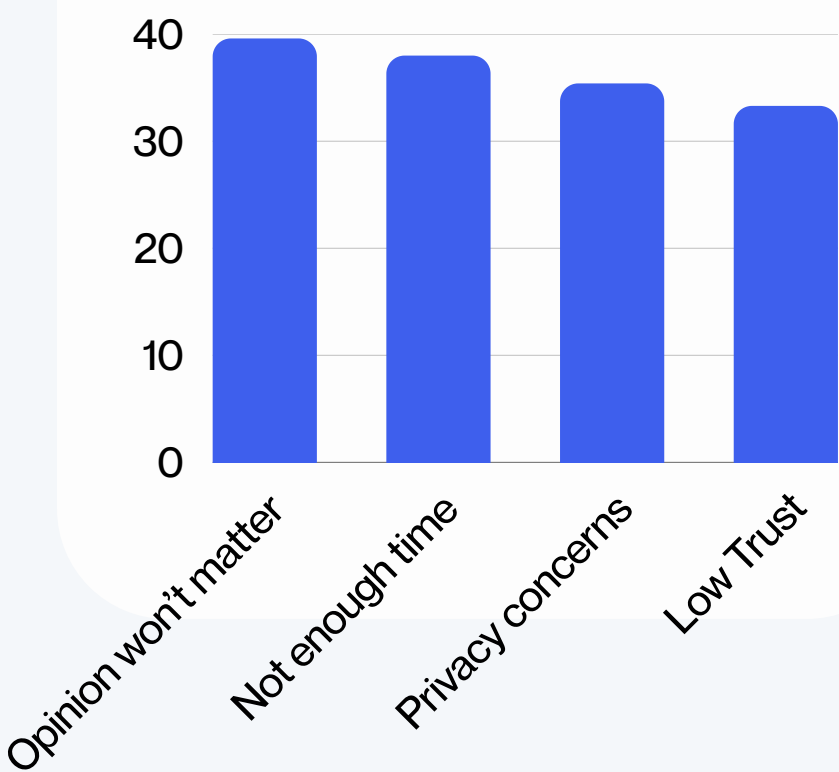

People care about public issues, but most do not feel their voice has real influence.

Barriers

Participation feels too **slow, unsafe, or ineffective.**

What users need

Users want participation to feel visible, relevant, and easy.

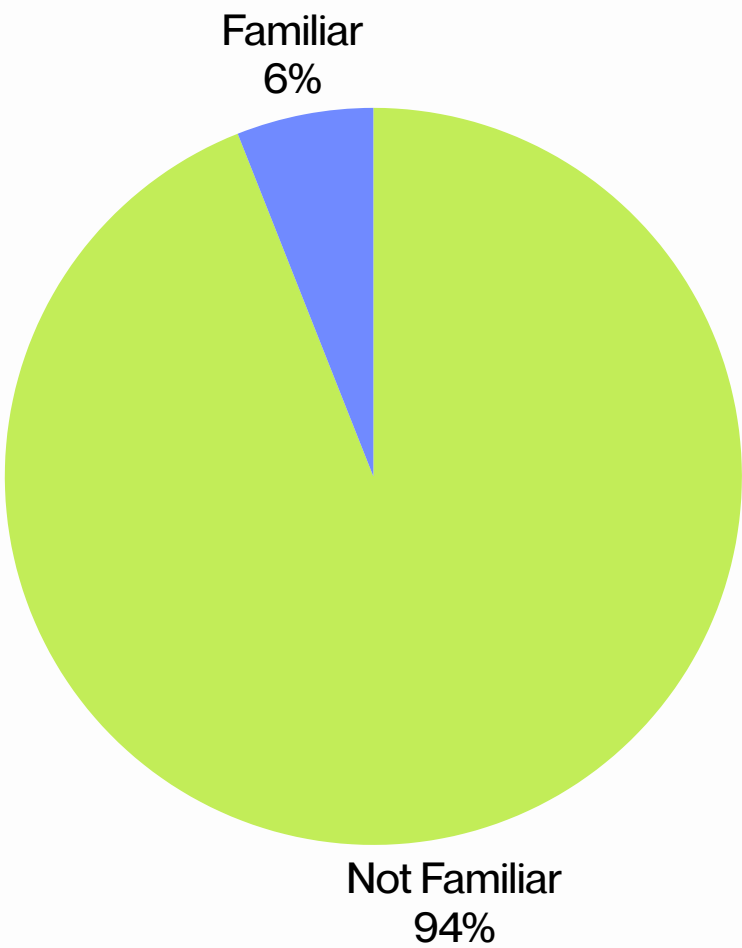

Relevant 54.2%
Easy 37.5%
Visible 54.2%

How respondents reacted to Nexus Politics

Awareness Gap

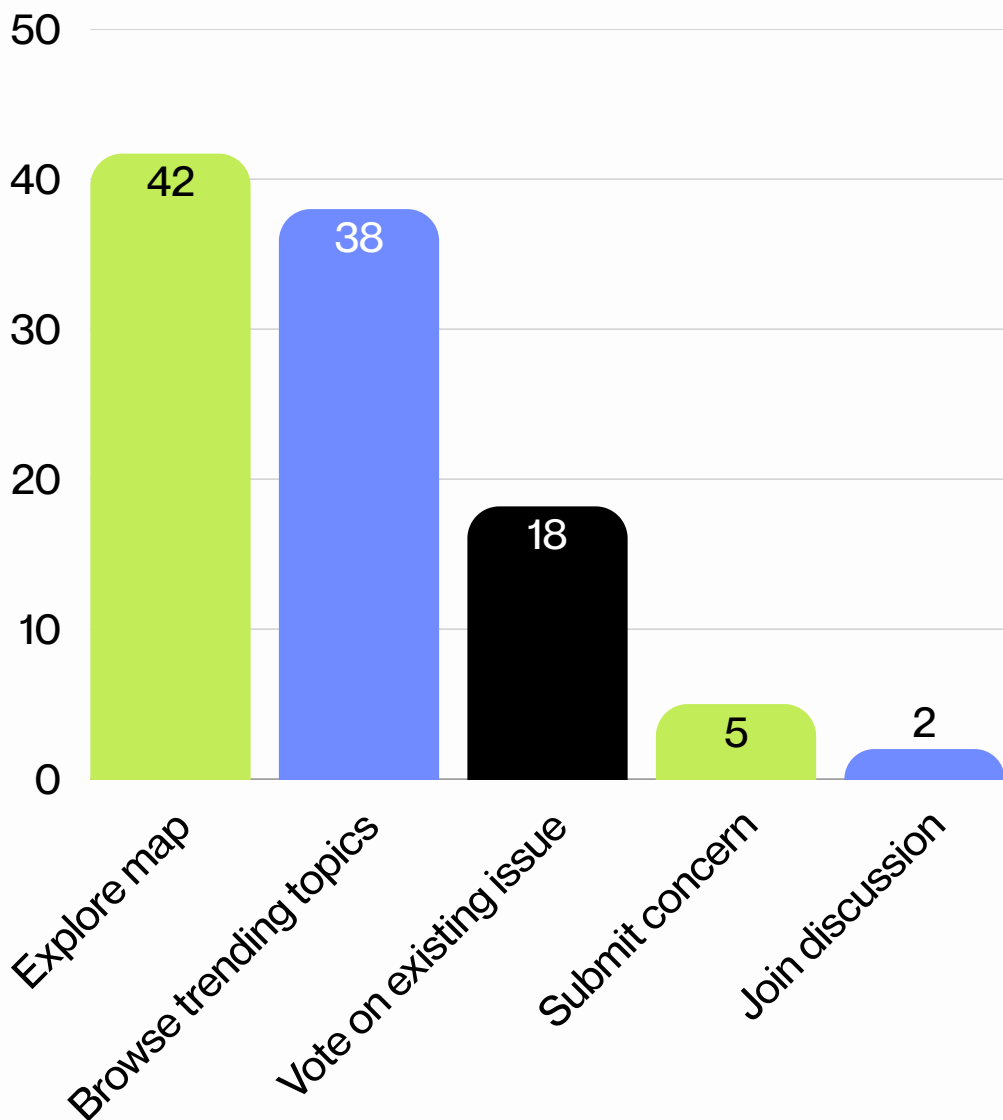

Nexus needs visibility and low-friction exploration

93.8%
were not familiar with Nexus Politics

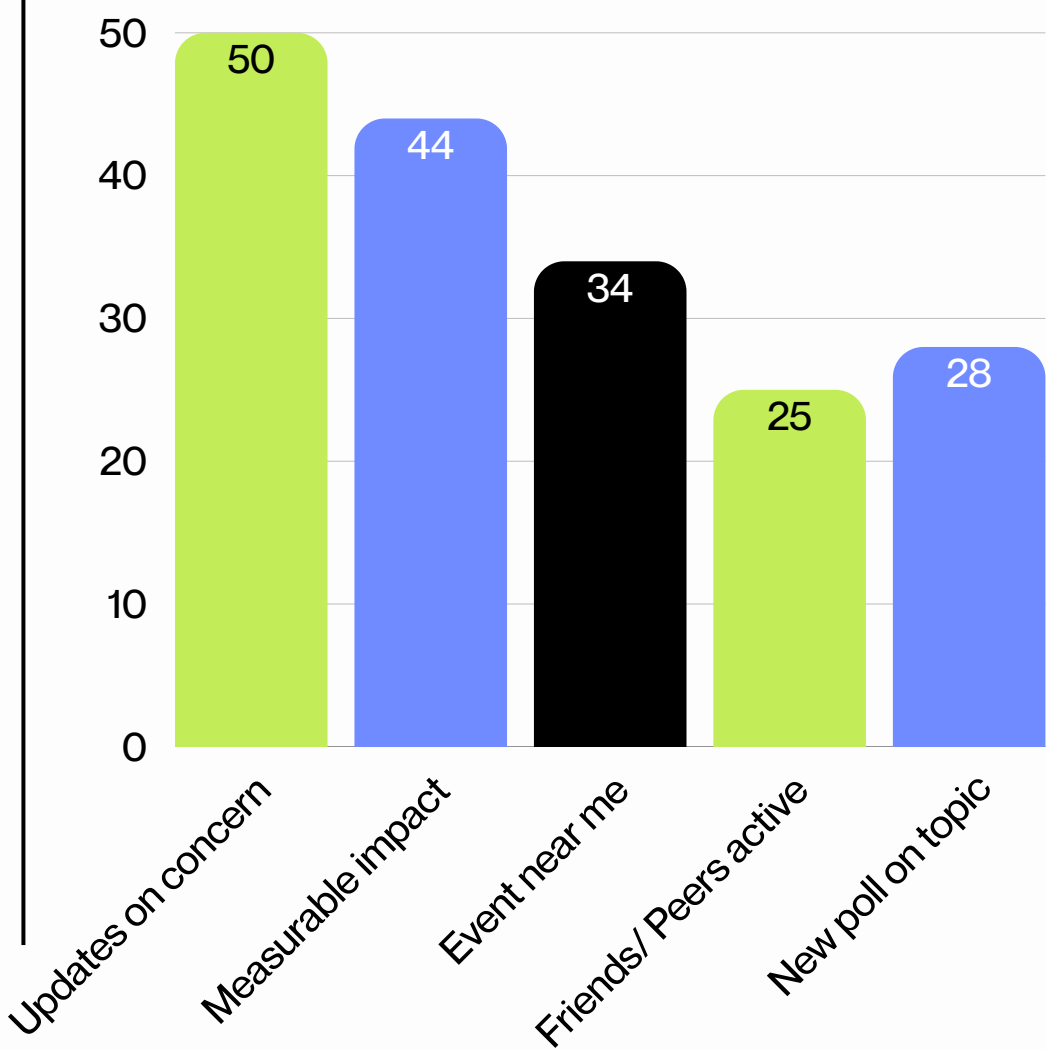

First Action

41.7%
would first explore **the map of concerns**

Return Drivers

50%
would come back for **updates on a concern**

Target Audience & Persona

YOUNG PROFESSIONALS & STUDENTS IN GERMANY

Voters under 30 have the LOWEST voting turnout rate!!

Future Developments

Petitions and Dialogues

A **third-party bridge** to guarantee **transparency** of each process of people's concerns. Direct dialogue with Politicians is possible.

More Gamification Features

Games for the platforms to attract more potential participants (both with NOT and POA Moderations).

Internal Versions

Promote the product to associations, universities, and other organisations at different levels and scales. **Chatrooms can be launched.**

People's Behaviour People decide!

No proactive sensorship.

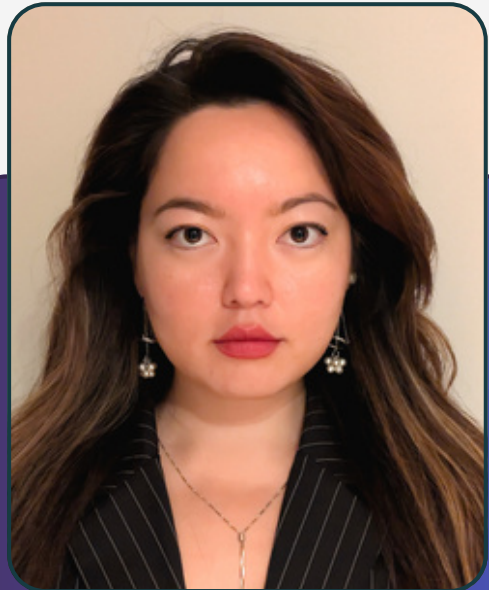

Censorship will only be triggered by reports and red flags. Users decide whether the speech is appropriate.

Mana is finally
engaged!
in Politics!
