M.A. Entrepreneurship &
Digital Transformation

Time To 1 Million Users: The AI Boom

But At What Cost?

But First...

Defining Inequality

“Inequality refers to the unequal distribution of resources, opportunities, and privileges among individuals or groups within a society. It manifests in various forms, including economic disparity, gender inequality, and discrimination based on race or ethnicity.” (UNESCO, 2026)

Dimensions Of Atlas AI

Social

Jobs requiring AI skills, internet access, net AI talent migration, use of ChatGPT

Environmental

Number of data centers, water footprint, CO2 emissions, land footprint, critical minerals (Lithium, Cobalt, Copper), electricity demand

Economic

Private investment in AI, headquarters of AI components, AI Patents, AI research publications, AI regulations
